

Supplemental Table: Underlying etiology of carotid free-floating thrombus.

Etiology	N (%)	Degree of underlying stenosis
Atherosclerotic plaque	66 (79.5%)	33/66 \geq 50% stenosis 32/66 < 50% stenosis 1/66 occlusion
Atherosclerotic plaque and atrial fibrillation	10 (12.0%)	7/10 \geq 50% stenosis 2/10 < 50% stenosis 1/10 ICA occlusion
Carotid dissection	4 (4.8%)	1/4 \geq 50% stenosis 3/4 < 50% stenosis
ESUS	3 (3.6%)	n/a

ICA = internal carotid artery, ESUS = embolic stroke of uncertain source
