

Supplementary data

Figure 1:

Distribution of the criteria for atrial cardiomyopathy (AC) according to ARCADIA definition in the excluded patients of the SAFAS cohort. 17 patients had at least 1 AC criteria (41%), and these were distributed as shown in the figure below. Abbreviations: NT-proBNP: N-Terminal pro-B-type natriuretic peptide. PTFV1: P-wave terminal force in lead V1. LADI: left atrial diameter index.

Figure 2:

Distribution of the criteria for atrial cardiomyopathy (AC) according to ARCADIA definition in the cryptogenic strokes of the SAFAS cohort. Abbreviations: NT-proBNP: N-Terminal pro-B-type natriuretic peptide. PTFV1: P-wave terminal force in lead V1. LADI: left atrial diameter index.
